

OCTOBER 6, 2024

TipMe

SOLANA RADAR HACKATHON SUBMISSION

Our mission is to help anyone get his first tokens and make the sending process as easy as making some tea.

We want to allow anybody to send and receive SOL & SPL tokens directly through Telegram.

Just message the bot “/send 1 SOL to @heymike777” and boom, it works.

Market estimate

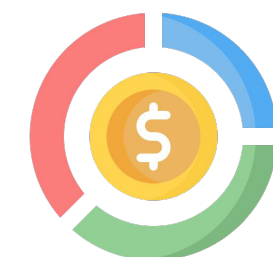

Telegram has
700M
monthly active users

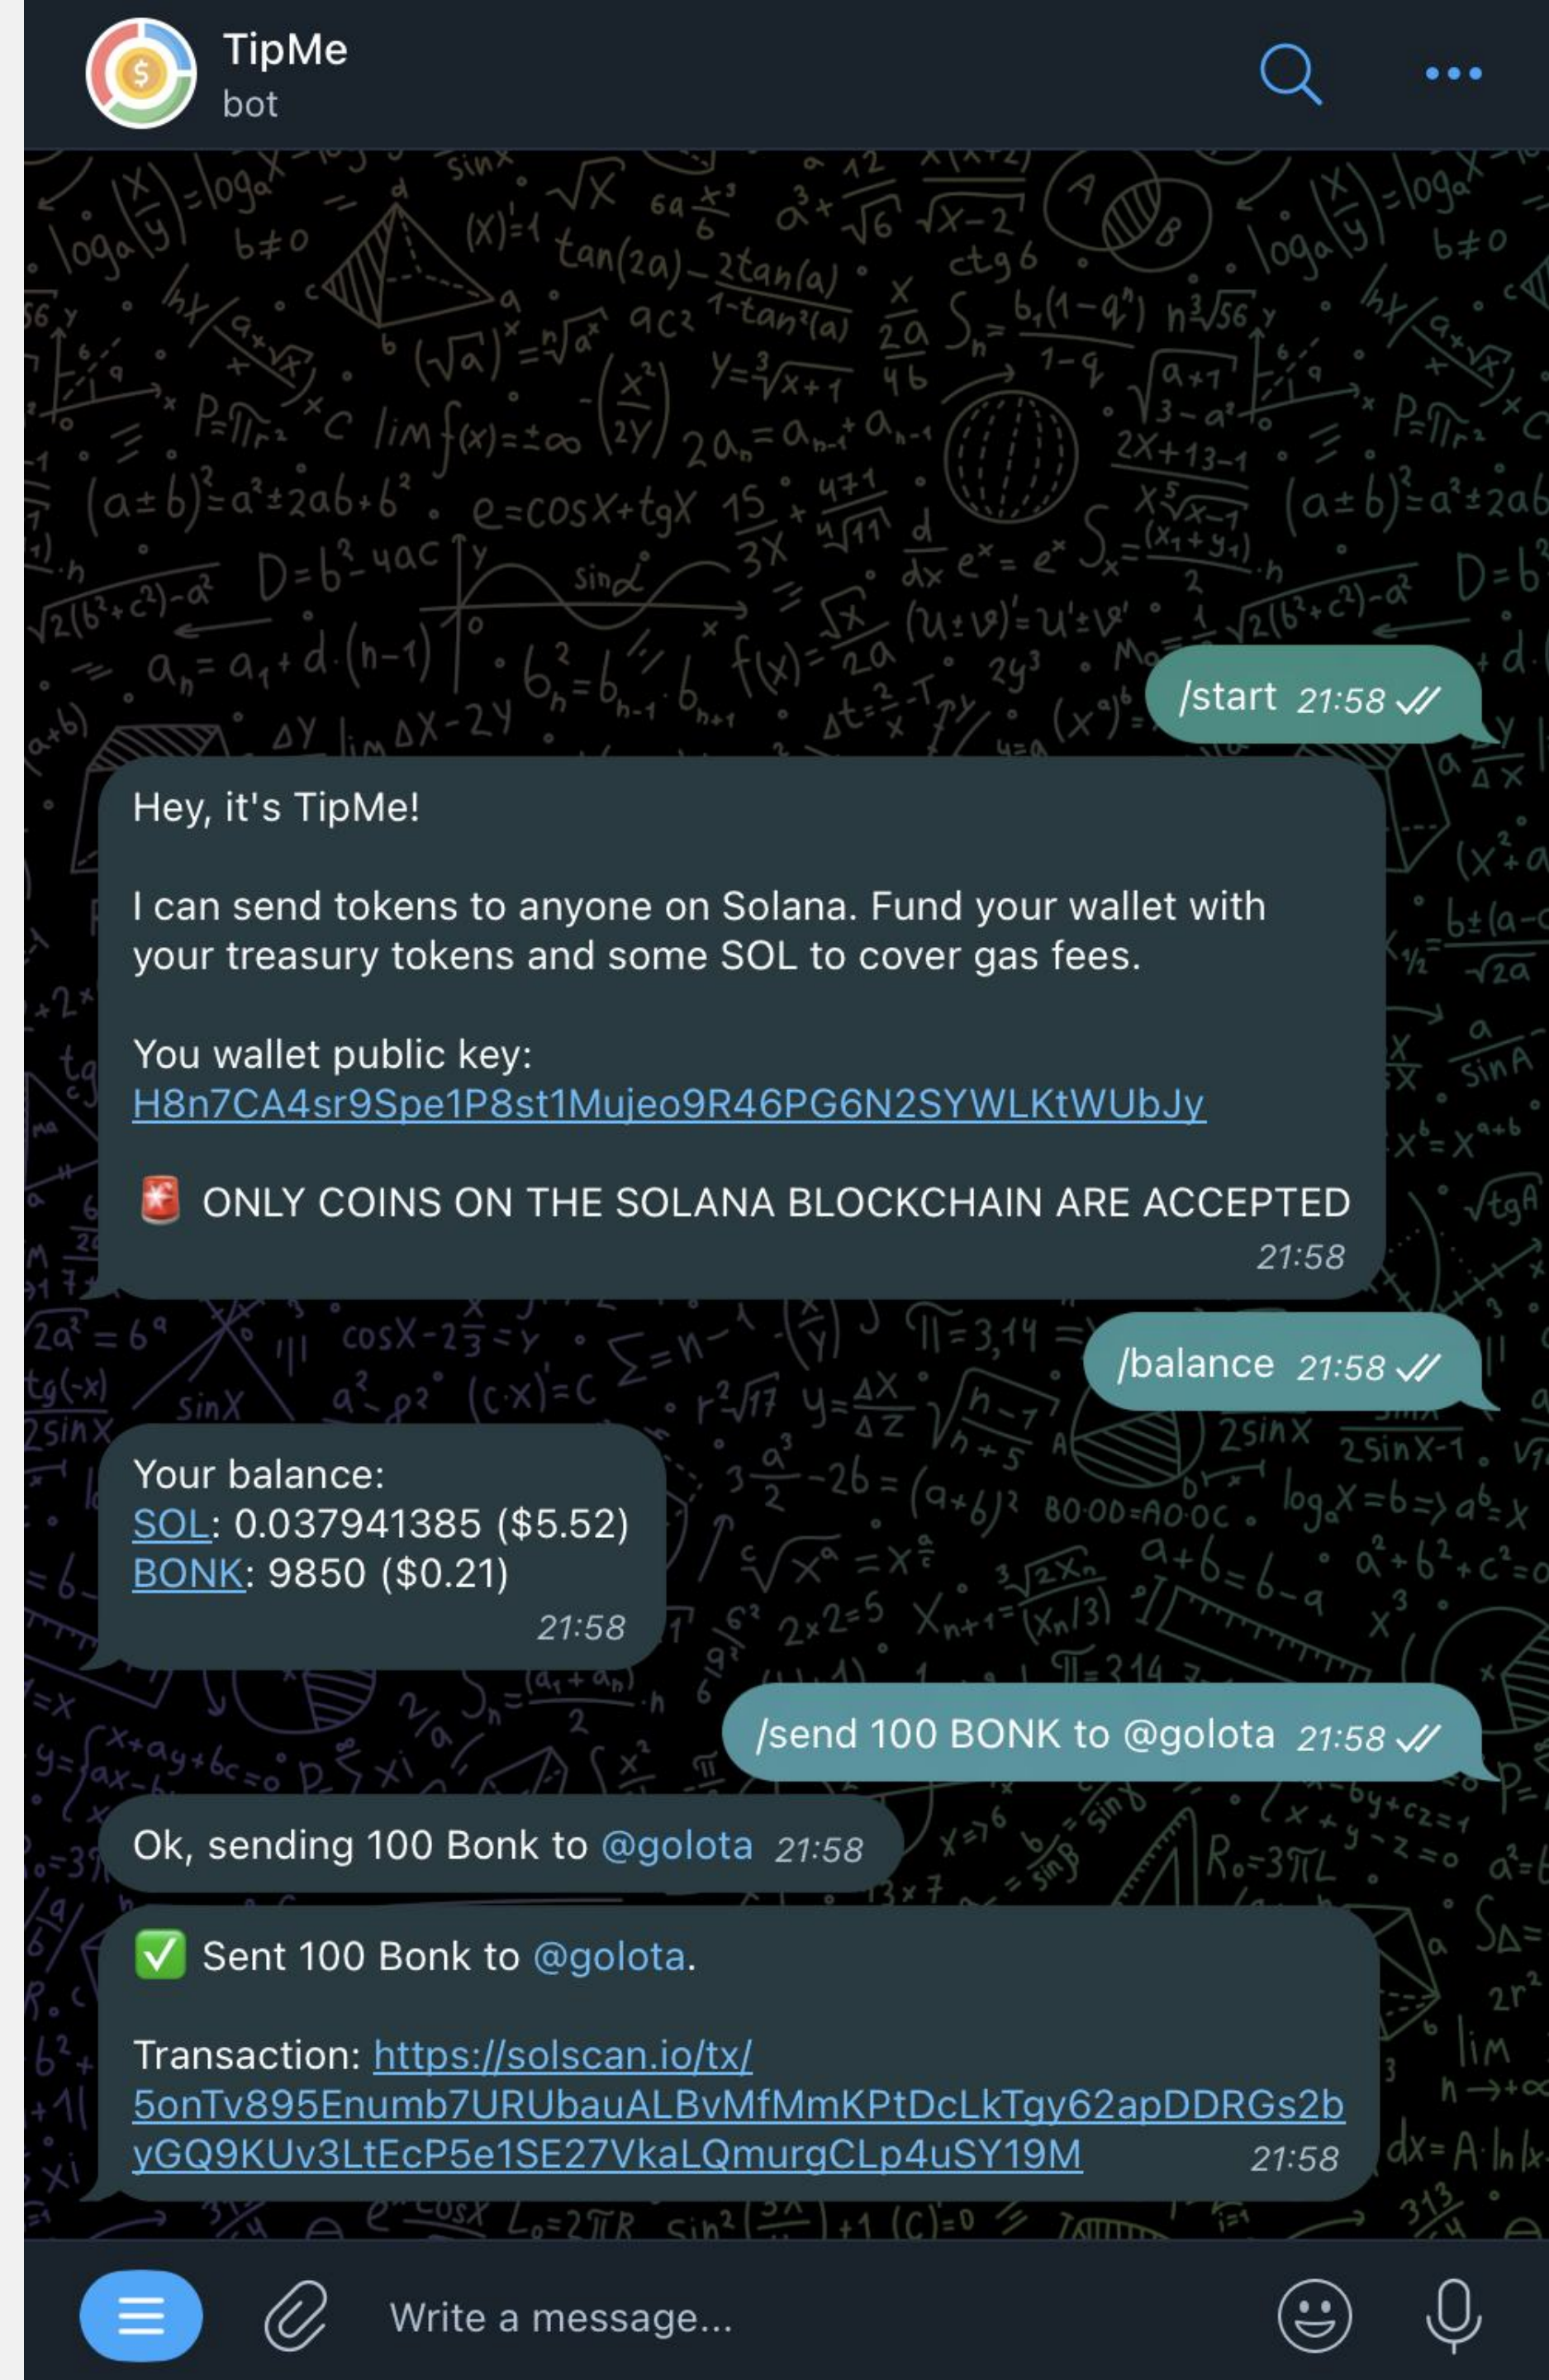

Solana has
3-4M
daily active addresses

TipMe could help
bring all Telegram
users to Solana.

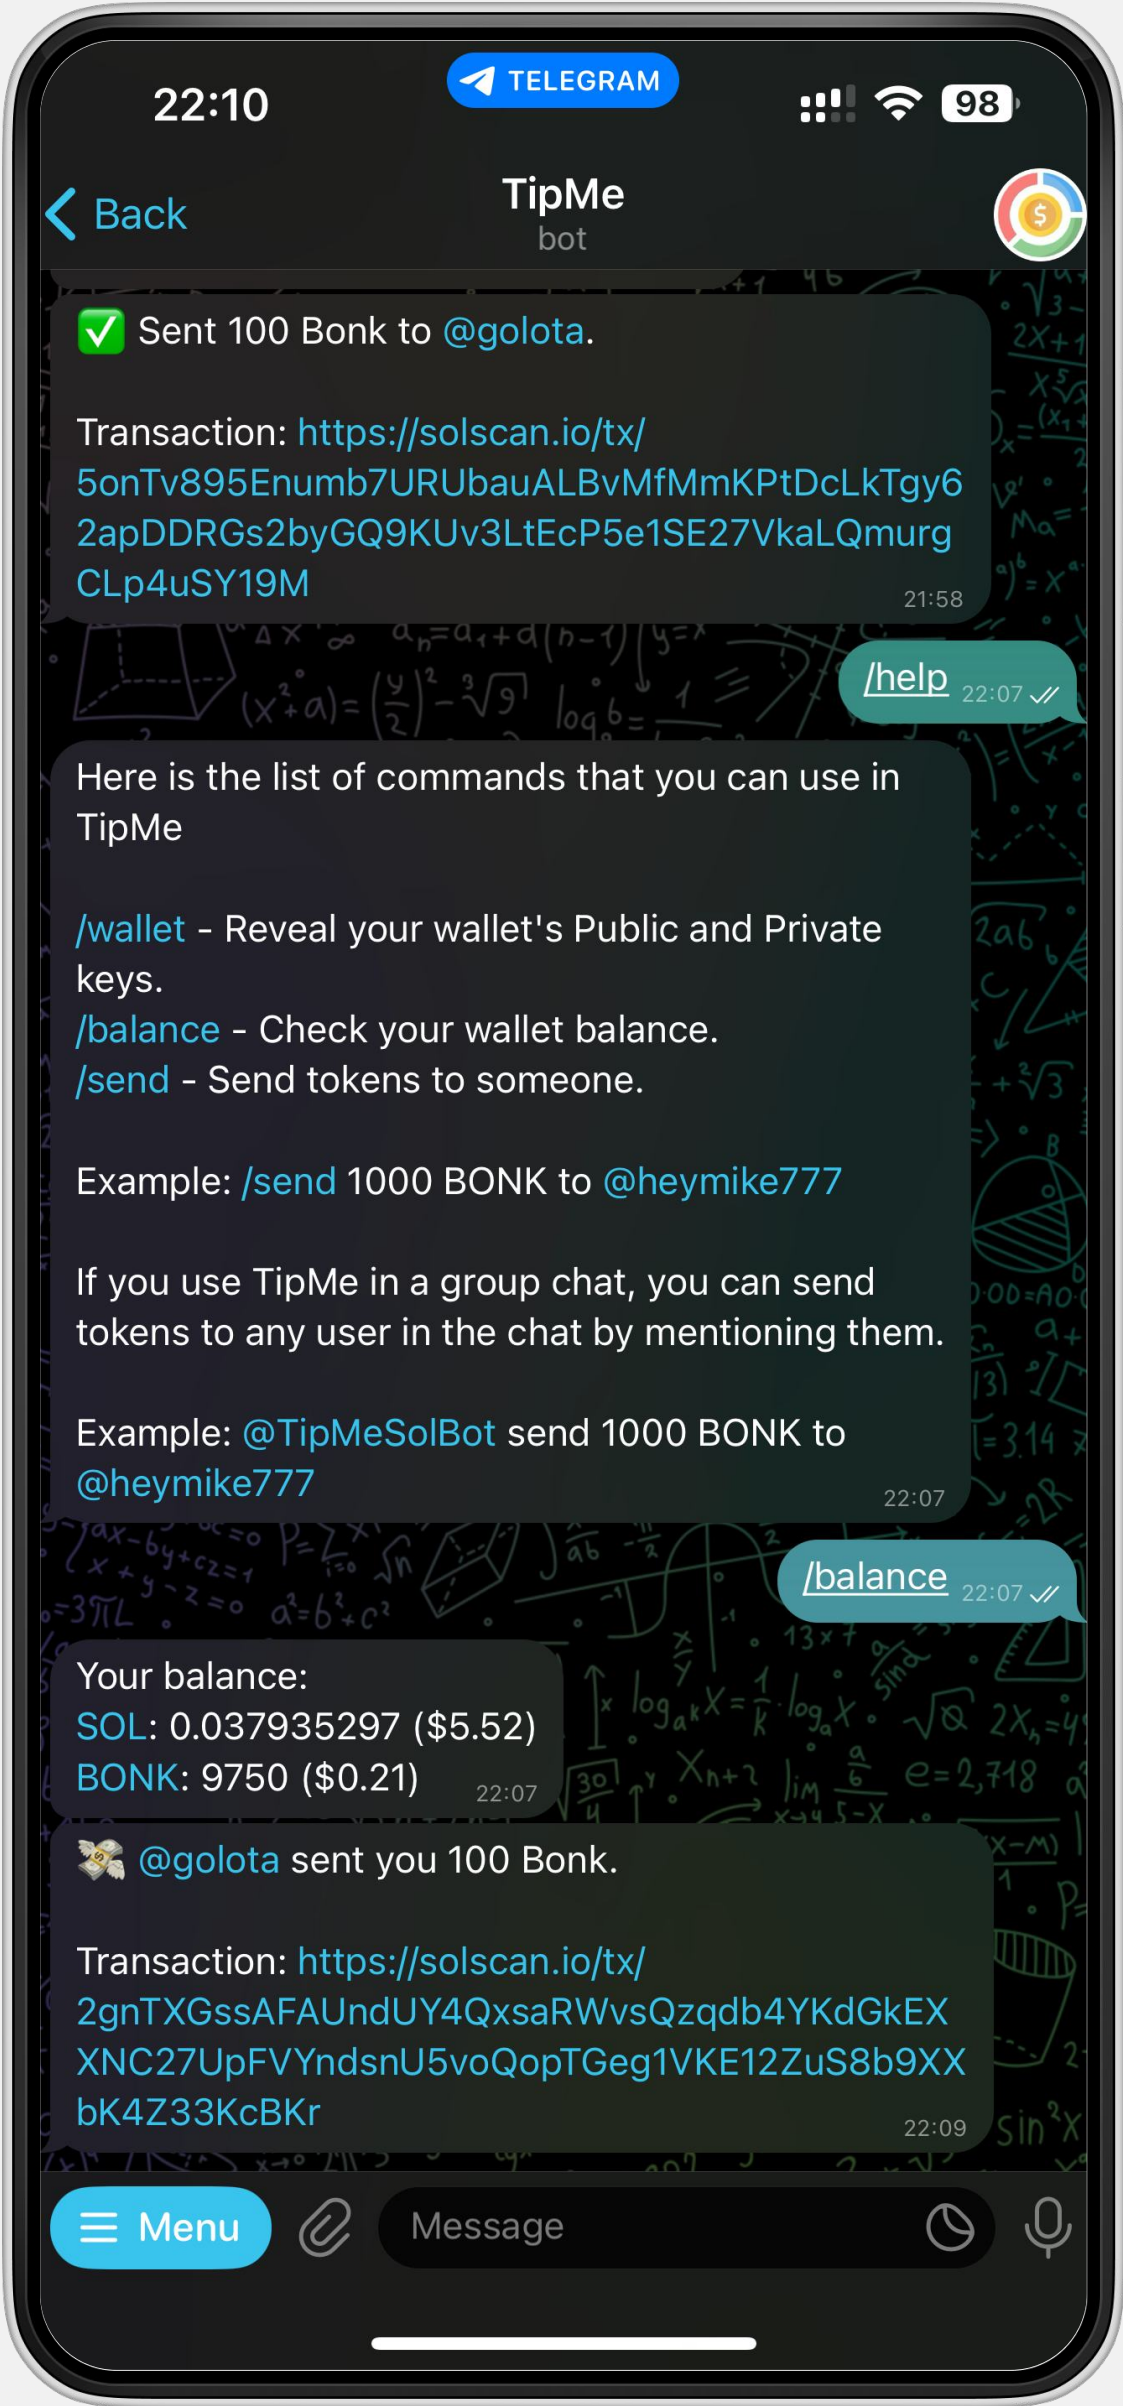

We've built a Telegram bot
@TipMeSolBot
that allows you to send any
token as simple as sending
a message.

If the receiver has not yet signed up for TipMe, their funds will safely sit there until they're ready to be claimed in the future.

Instant notifications

Once someone sends you any tokens, you instantly receive a message from Bot and transaction as a proof.

Thank you
